

CLP Power Hong Kong Limited

With its leading position in the power business in Hong Kong, starting a career at CLP Power is, no doubt, both rewarding and challenging. The company provides a safe and fulfilling working environment with attractive remuneration and benefits, as well as a promising career prospect in the engineering profession.

As an engineering graduate, the CLP Power Graduate Trainee programme in the Electrical Engineering discipline fully meets the Hong Kong Institution of Engineers Scheme 'A' training requirement. As part of my responsibility, I plan and execute project work, carry out repair and maintenance activities, and also negotiate with customers, contractors, utilities and the government for permit issue and work coordination.

Besides that, I also play an active role in the Sustainable Energy Curriculum, an environmental education programme that allows me to share my technical knowledge and industrial experience with students at participating secondary schools, and the CLP Young Power Programme to raise environmental awareness and cultivate a sense of social responsibility among the younger generation.

The most rewarding part of my job is being able to apply my professional knowledge and experiences to solve engineering problems to meet the customer's expectation and needs. I am also proud to have the opportunity to contribute to the development of power systems.

The job has also made me much more prepared to be a professionally trained electrical engineer. It has allowed me to acquire knowledge and experience of general engineering practices, project management, supervisory and leadership skills from engineering professionals at all levels.

Looking ahead, I wish to contribute further to the development of power systems to meet the growth of the city and to strive for excellence in the electricity supply business. Right now, my immediate goal is to become a professional electrical engineer and to move into a position of responsibility to develop long term strategies and execute high level decision making to meet the challenges of the new world.

Name

Kwok Hiu Kam, Richard

Current Placement

Engineer II, East Region,
CLP Power Hong Kong Limited

Qualification

Master of Science in Electrical Engineering, the Hong Kong Polytechnic University (ongoing)

Bachelor of Engineering (Hons) in Electrical Engineering, the Hong Kong Polytechnic University

Higher Diploma in Mechanical Engineering, the Hong Kong Polytechnic University
